

SOLUTION OVERVIEW

PLEX QUALITY MANAGEMENT SYSTEM (QMS)

Plex QMS helps you meet your quality needs and enables your business to take the lead in quality. Using software ensures your content is aligned throughout your QMS, and meets IATF and customer software specifications for revision control and document linkage.

IATF-16949 Requirement <i>IATF does not list software requirements outside of ASPICE</i>	Feature	✓
Version Control	Cloud-based, multi-tenant application, 99.9% uptime	
Process Control	Manage customer, internal and supplier PPAPs	
	Supports PFMEA, DFMEA, Reverse FMEA (Including the AIAG & VDA FMEA Handbook)	
	Ability to collect SPC data	
	Built-in SPC charting and automatic alerting	
	Control Plans always synced to PFMEAs and PFDs	
Supplier Management, Test & Calibration	Linkage between process flow, PFMEA and control plan. Changing the order follows the build logic of the three documents. Additionally, linkage is the current buzzword.	
	Gages linked to control plans	
Change Point Control	Revision control	
	Support multiple customer projects and Gantt charts	
	Communications Log	
	Multi-language support, ability to modify as needed	
Organization	Meeting Notes	
	Program and project management	
	Workflow to enable consistent business processes	
	Embedded Document Management System	
	Unlimited data storage	
	Role-based security access	
	Ability to leverage part and quality data in the future	

How many boxes can you check with your current quality management system?
If you missed any, you should explore the Plex Smart Manufacturing Platform.
